SUMMARY

I'm a Full Stack Developer passionate about building intelligent, high-performance software products. Experienced in AI, Machine Learning, and Cloud Computing, I have developed applications using Python, Flask, React, and RESTful APIs, with databases like MySQL and PostgreSQL on Google Cloud, IBM Cloud, and AWS. My projects include an emotion detection system, a RAG-based ChatBot, showcasing my ability to create user-focused, data-driven solutions. I enjoy turning innovative ideas into scalable products with real-world impact.

WORK EXPERIENCE

KPMG – Product Management Intern

Aug 2025 – Present

- Collaborated with cross-functional teams to optimize analytics workflows, improving efficiency by 20%.
- Analyzed datasets to identify gaps and proposed actionable product enhancements adopted across teams.
- Oversaw full product lifecycle, from requirement gathering to deployment of automation pipelines.
- Streamlined reporting and dashboards, enhancing data-informed decision-making across departments.

SDE Intern (Director's Intern) – CRIE MIET, Jammu

Apr 2024 – Jul 2025

- Selected as top 1% of 400+ students for a prestigious Director-level internship.
- **Enhanced** Chat-Pi360 AI chatbot and Pi360 Mobile App, improving campus automation and engagement.
- Built backend automation scripts and APIs, **optimizing** operational task efficiency by 25%.
- Created a RAG-based SQL Generator with sliding window protocol, **expanding** query accuracy by 40%.
- Applied modular design, file handling, API integration, and end-to-end product delivery.

PROJECTS

Chat-Pi360: Conversational AI Chatbot for Pi360

[LINK](#)

- **Constructed** AI chatbot using LLaMA 4 and Retrieval-Augmented Generation (RAG).
- Integrated sliding window protocols and secure APIs, improving context accuracy by 40%.
- **Applied** full-stack solution using Python, Flask, and React for real-time interactions.

GST Filing & Compliance Automation Platform (KPMG + State Tax Office)

[LINK](#)

- **Designed** enterprise GST platform covering GSTR-1 to GSTR-9 forms and amendments.
- Built backend APIs and automation pipelines using Python, SQL, Flask, improving efficiency by 30%.
- Integrated RAG for intelligent query handling and real-time compliance support.
- **Executed** multi-threaded data pipelines, accelerating high-volume processing by 25%.

Blockchain-Based Voting System

[LINK](#)

- **Created** decentralized election platform using Ethereum, Solidity, and Web3.js.
- Implemented real-time identity verification and immutable audit logs, enhancing security and trust.
- Enabled transparent, tamper-proof voting with blockchain smart contracts.

- **Constructed** real-time geospatial processing modules using TensorFlow Lite and OpenCV.
- Optimized for mobile GPU/NPU acceleration, enabling real-time offline analysis.
- **Applied** interactive visualization tools and offline export for field operations.

EDUCATION

B. Tech in Computer Science, Model Institute of Engineering and Technology (Autonomous), Jammu, J&K <i>CGPA: 7.9/10</i>	2022 – 2026
12th Standard, Model Institute of Education and Research, Jammu, J&K <i>CGPA: 7.6/10</i>	2022
10th Standard, G.D. Goenka Public School, Jammu, J&K <i>CGPA: 7.4/10</i>	2020

CERTIFICATIONS

- **NPTEL: The Joy of Computing Using Python** — Gained a strong foundation in Python programming through hands-on projects, algorithms, and real-world problem-solving.
- **Google Cloud: Machine Learning Engineer** — Mastered ML model building, deployment, and MLOps practices using TensorFlow and Google Cloud services.
- **IBM: AI Developer (Professional Certificate)** — Developed and deployed AI-driven solutions including chatbots, computer vision, and NLP models using Python.
- **HackerRank: SQL (5), Problem Solving (3), C++ (4)** — Demonstrated strong skills in database management, algorithms, and competitive programming challenges.

SKILLS

Programming Languages:	Python, C++, SQL, JavaScript, HTML/CSS, JS
Frameworks:	Flask, Django, TensorFlow, PyTorch, Bootstrap, Streamlit, RetinaFace
Libraries:	pandas, NumPy, Matplotlib, OpenCV, scikit-learn, Beautiful Soup
Cloud & DevOps:	AWS, Google Cloud Platform, Git, GitHub, Vercel, VS Code, Figma
Databases:	MySQL, PostgreSQL, SQLite3, Firebase, MongoDB, MariaDB
Core Skills:	API Development, MLOps, Modular Backend Design, Secure Data Access, Automation, RAG Systems
Soft Skills:	Problem-Solving, Team Collaboration, Adaptability, Time Management, Critical Thinking
